

Do you know that?

Normal type air compressor is a big consumer of electricity, it wastes your money every day!

Are you still using Normal type air compressor?

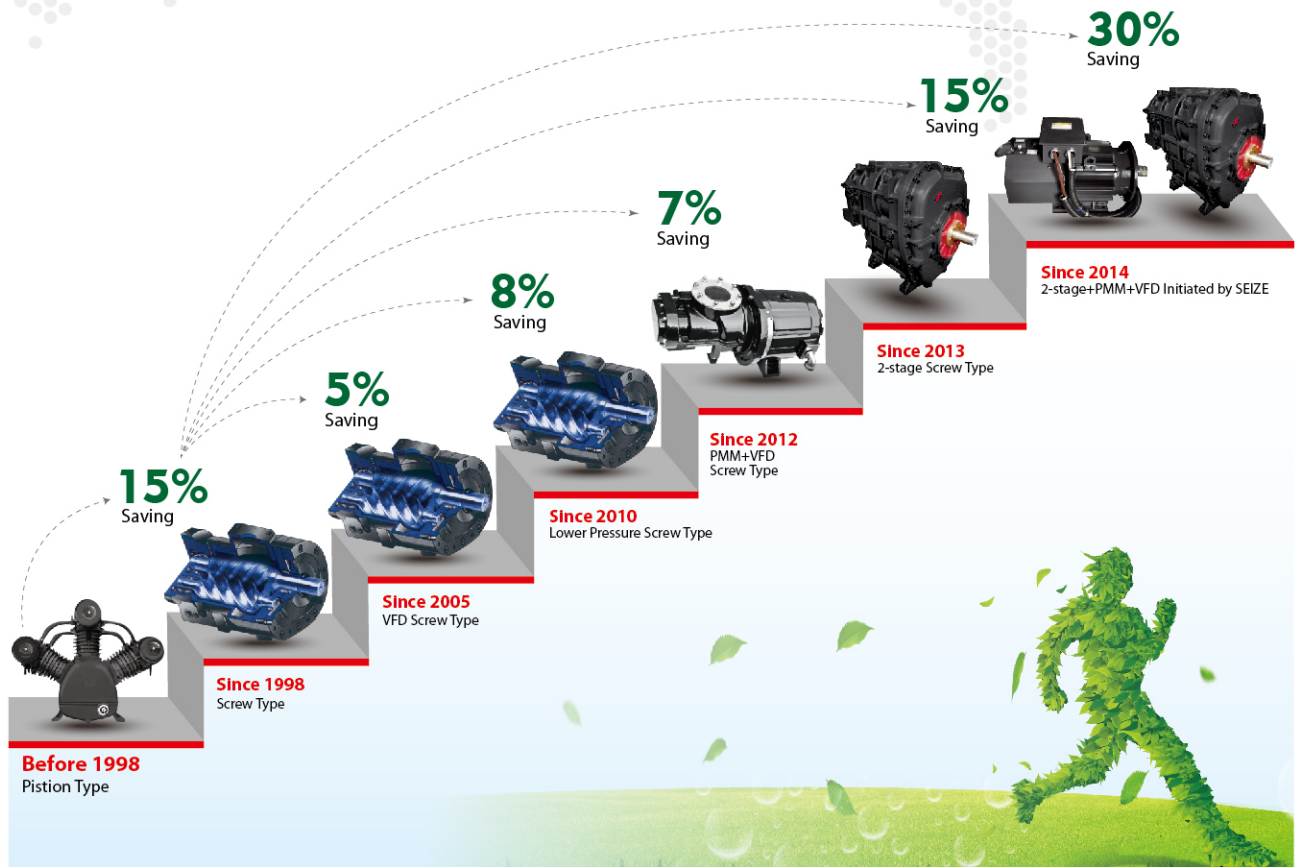

Our Energy saving system could help saving **20-30%** electricity cost averagely.

**Laser Cutting Customized
- Energy Saving Air Compressor**

Development of Air Compressor

Mission of SEIZE company

Help employees grow, let employees help customers maximize the benefits, provide the ultimate, energy-saving, highly reliable and cost-effective products to contribute to social energy conservation and environmental protection.

Mission of SEIZE EMPLOYEES

Each 1KW air compressor sold, it can help customers save about 285USD in electricity bills on average every year, and save 2.355 tons of carbon emissions for the earth.

Energy saving mission of SEIZE

Come up to the lowest operation cost of compressed air for SEIZE users.

Partial patents and certificate numbers

01. Energy saving air compressor
02. Adjustable fuel injection for air compressor
03. Appearance design patent
04. Quick lubrication air compressor
05. Partial frequency conversion cooling device and air compressor
06. Permanent magnet Double stage Two inverters air compressor
07. High-temperature gas cooling
08. Low pressure drop oil&mist separation
09. Oil return check valve with built-in filter
10. Non-stop air compressor
11. Double-stage energy-saving air compressor with adjustable pressure ratio
12. Full filter air compressor and air compressor case
13. Frequency conversion system of air compressor with spare frequency converter
14. Air compressor lubrication system with two oil filters automatically switched
15. After-treatment device capable of adjusting compressed air outlet temperature
16. Air compressor with self-cleaning filter

Laser Cutting Customized Energy-saving Air Compressor Product Features

5 features

01 Intelligent frequency conversion control system

1. Frequency conversion drive, constant pressure output
2. Intelligent controller, monitor pressure, temperature, power fluctuations, intelligently adjust compressed air production, maximize energy saving
3. Easy operation and friendly human-machine interaction

02 Integrated permanent magnet motor and air end

1. Specially made 16Bar Air end, with heavy-duty bearings, high efficiency and long life
2. IE4 standard High efficiency permanent magnet motor.
3. No unloading time.
4. **100%** transmission efficiency

03 Double Air/oil separator system design

1. Built-in large Capacity Air/oil separator
2. Spin-on Air/oil separator separates the oil and compressed air again, oil content is low, gas quality is guaranteed
3. Air/oil Separator life time longer

04 Integrated design of Air dryer and filter system

1. Triple pipe filter configuration
2. The filter has manual and automatic drainage design
3. Low exhaust water content, gas quality is guaranteed

05 Integral piping system

1. Use stainless steel fine tube
2. Simple structure and nice overall
3. Never rust, smaller pressure drop

Technical parameter

Model	Power(Kw)	Air delivery(m ³ /min)	Pressure(Mpa)	Outlet pipe size	Weight(Kg)	Dimension(mm)
SJVC-11A	11	1.0	1.59	G3/4	360	1050*700*1050
